Tennis Courts Crack- The Riteway Crack Repair System makes the repair!

The Copland Coating Company has been maintaining the six courts at Belvoir Terrace for at least thirty years. The courts were built at various times, the oldest in 1954 so over time there have been cracks in some of the surfaces. Several years ago Steven Hinding, vice president of Copland, asked if Belvoir would be a trial for the Riteway Crack Repair System on our oldest courts. Calvin Pallenberg, one of the owners of that company, was on site and personally installed the product and trained the Copland workers. That court, all our courts have done extremely well with the Riteway Crack Repair System as handled by the Copland Coating Company.

This winter was particularly difficult with the extreme cold and thaws so the courts suffered some new cracks over the winter. Copland will apply the Riteway System this month and we anticipate excellent results.

With this system old cracks stay corrected and new cracks and imperfections can be repaired. Belvoir Terrace is pleased with the work of the Copland Coating Company and their use of the Riteway Crack Repair System on our tennis courts.

Sincerely,

Nancy S. Goldberg
